

SYC Race Station Start-up

Right Click on app and pin to start

Log in From Rainbow Screen

Swipe up from Bottom > Click SYC

Racing Signals starts automatically (by the Task Manager)

Log Out

Swipe in from RHS > Click Start Squares > Click Person Picture > Click Sign Out

Shut Down

Same as Log Out but Click on/off icon > Shut down

Start in Desktop

1. After booting Windows 8.1 (here's [how to get the preview](#) if you don't already have it), click the *Desktop* tile to enter Desktop mode.
2. Right-click any open area in the taskbar, then click *Properties*.
3. Click the *Navigation* tab, then check the box next to *Go to the desktop instead of Start when I sign in*.
4. Click *OK*, then reboot. Windows should plunk you right into Desktop.

Set up Scheduled Task

1. Open Control Panel
2. Change View by to Small Icons
3. click on Administrative Tools Icon.
4. Look down the list of option and select Task Scheduler.

The Racing Signals Task was created in the SYC profile, but the Task is displayed in both JNA and SYC

Task Scheduler (Local)

Task Scheduler Library

Racing Signals (scroll down)

Right Click to Enable/Disable

http://www.manageengine.com/products/desktop-central/help/computer_configuration/configuring_windows_task_scheduler.html

Startup Folders

<http://www.addictivetips.com/windows-tips/where-is-startup-folder-how-to-edit-startup-items-in-windows-8/>

Windows + R hotkey combination, and enter %AppData%

OR in Widows Explorer

C:\Users\<User Profile folder

name>\AppData\Roaming\Microsoft\Windows\StartMenu\Programs\Startup

Or

Administrative Tools > System Configuration > StartUp > Open Task Manager

Or Win+R, then type "shell:startup" (without quotes) and "shell:Common Startup" for the other startup folder.

Time Server

<https://www.meinbergglobal.com/english/sw/ntp.htm>

Password for NTP account is password

Racing Signals

Hide the Task Bar: Right click on task bar > Navigation > Tick AutoHide

Also Untick Show Charms and Switch apps

When I sign in goto to Desktop

FrmMain.Moveable = false

Better do it with registry settings
