

## CAPICOM.DLL has not installed properly

### 64 Bit OS

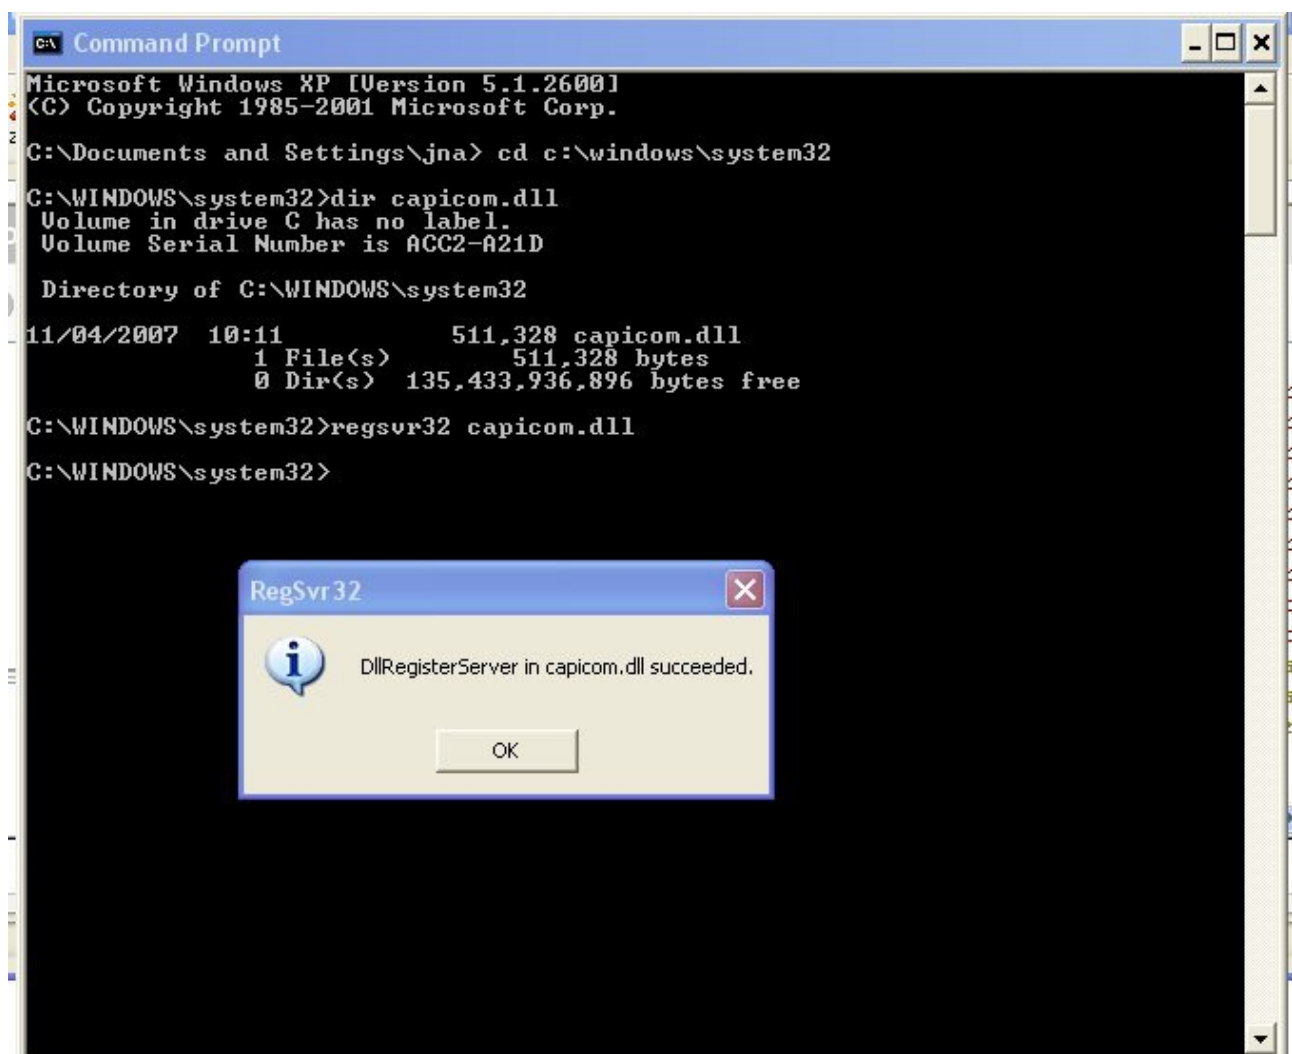

1. Open a CMD prompt as Administrator
2. Change Directory to CD c:\windows\sysWOW64\

### 32 Bit OS

1. Get a DOS prompt
2. Change Directory to C:\windows\system32\

### 32 & 64 Bit OS

3. see if capicom.dll exists by entering  
dir capicom.dll
- 3a If Capicom.dll does not exist download it from  
<http://www.microsoft.com/en-US/download/confirmation.aspx?id=25281>
4. Enter regsvr32 capicom.dll
5. You should see a confirmation message
6. Run AisDecoder & see if you still get the ActiveX message

Above is 32 bit example
